

How to Submit:

- Put everything into a Google Drive or Wetransfer
- Label your files clearly

Scenario/Theme:

Scenario:

Nudle is launching a Basic End User Computing Course aimed at empowering unemployed youth, adults, and first-time computer users with practical digital skills.

The course covers:

- Basic computer operations
- Email and internet use
- Microsoft Word, Excel, PowerPoint
- Introduction to AI tools (e.g., ChatGPT)

We want a digital experience that feels modern, inclusive, and simple — appealing to users who may have limited tech exposure.

Part 1 — Course Landing Page UI/UX Design (3-page Web Flow)

Task 1:

3-Page Responsive Website Design (Desktop + Mobile Views)

- Home Page: Course value, key highlights, strong Call to Action (Register Now)
- Course Overview Page: Curriculum breakdown, learner benefits, testimonials
- Partners & Impact Page: Social mission, success stats, partner logos

Part 2. Tri-Fold Digital Brochure (Web & Print Ready)

- Course name with original slogan
- Overview of modules, course details, and target audience
- Clear Call to Action (Apply Now)

Design Notes:

- Prioritize UX simplicity — avoid clutter and ensure clear actions
- Use inclusive, relatable imagery
- Ensure high contrast and readable typography
- Design with first-time tech users in mind

Bonus Challenge

- Provide a short written explanation of your design decisions (1 paragraph per part)
- Show your UX thinking: How does the design solve for the target user?
